Integrated M.Tech Software Engineering student with software development internship experience and hands-on experience in product case studies and data analytics. Skilled in user research, competitive analysis, requirements gathering, feature prioritization, project tracking, and KPI reporting. Combines technical expertise in Python, SQL, and Generative AI with analytical thinking, Agile practices, and cross-functional collaboration to support data-driven product decisions and project execution.

SKILLS

Product Management: User Research, Competitive Analysis, Problem Discovery, Requirements Gathering, PRD Development, Feature Prioritization, Roadmap Planning, Product Metrics
Project Management: Project Coordination, Milestone Tracking, Risk Identification, Progress Reporting, Stakeholder Communication, Agile, SDLC
AI & Technical: Python, SQL, C++, Generative AI, RAG, LangChain, Pinecone, Prompt Engineering, Flask, REST APIs, Git
Data & Analytics: Excel, Power BI, Looker Studio, KPI Tracking, Dashboard Development, Data Analysis
Soft Skills: Analytical Thinking, Problem-Solving, Communication, Collaboration, Adaptability

WORK EXPERIENCE

OPEN Financial Technologies — Software Engineer Intern **Bangalore, India | Jun 2024 – Jul 2024**

- Collaborated with software engineers throughout the SDLC to debug, test, validate, and support deployment of software features.
- Assisted in developing and maintaining frontend modules using Svelte and Vite.
- Validated product features, analysed user workflows, and supported product enhancements in a fast-paced fintech environment.

PROJECTS

Swiggy - Delivery Transparency & Customer Feedback Analysis | Product Case Study *GitHub*

- Analyzed 50 app reviews to identify recurring customer pain points across delivery reliability, order accuracy, refunds, support, and pricing.
- Developed a delivery-transparency improvement concept, translating customer feedback into product opportunities and potential trust and retention improvements.

Campus Ride-Sharing — User Research & Problem Discovery | Product Case Study *GitHub*

- Conducted 5 user interviews to explore off-campus travel challenges, user needs, and potential ride-sharing opportunities.
- Synthesized qualitative feedback into problem statements, user needs, and potential product directions.

Real-Time Interactive Swiggy Dashboard | Excel, Power BI *GitHub*

- Analyzed 197,430 sales records using pivot tables, charts, slicers, and interactive visualizations.
- Explored revenue, customer, restaurant, and regional performance to surface business trends and support data-driven decisions.

Medical Chatbot — RAG-Based Conversational AI System | LangChain, Pinecone, Flask, AWS *GitHub*

- Developed a RAG-based chatbot using LangChain and Pinecone to retrieve relevant information from a medical knowledge base containing 100+ documents.
- Implemented document preprocessing, semantic search, and data validation to improve retrieval quality and response reliability.

EDUCATION

M.Tech Integrated – Software Engineering **09/2022 – 07/2027**
Vellore Institute of Technology CGPA: 9.04/10

Higher Secondary (HSC) **09/2019 – 07/2021**
MSP HSS Malappuram, Kerala 97.83 %

Secondary School (SSLC) **07/2018– 07/2019**
MSP EMHS Malappuram, Kerala 100 %

ACHIEVEMENTS & CERTIFICATIONS

- Project Management Foundations - LinkedIn Learning
- AWS Cloud Operations: Compute & Storage
- Oracle Agentic AI Foundations Associate Certification, 2026
